

AutoBuddy: Kerala's Next-Generation Mobility Platform

KSUM Innovation Grant Application

Safer rides. Better projected driver earnings.
Smarter local transport operations.

The Problem: Kerala Mobility is Structurally Broken

Current market extraction models create a negative feedback loop for all local stakeholders.

Sizing the Regional Opportunity

The unorganised transport sector is ripe for dedicated digital transformation.

₹500 Cr+
**Unorganised
Sector**

Massive, fragmented
commercial mobility market
within Kerala.

1.5 Lakh+
**Auto
Drivers**

The total addressable
regional market.

5,000
**Targeted
Drivers**

Our immediate pilot
onboarding target for initial
market penetration.

Our Strategic Moat: Optimised for Kerala

Large platforms optimise for national scale.
AutoBuddy is purpose-built for regional realities.

Product Validation: The Passenger Experience

Purpose-built for local commuter safety and convenience.

Kerala Safety Shield

Dedicated safety menu with direct integration to Kerala Emergency lines (Police 112, Women 181, Ambulance 108).

Malayalam Voice SOS

Native language voice activation feature ('സഹായം' / 'sahaayikku').

Projected Efficiency

Routing algorithms targeting < 5-minute ETAs for local commuters.

Product Validation: Driver Empowerment

Treating local drivers as platform partners, not just gig workers.

Driver Command Centre

Intuitive interface for managing ride flow, earnings, and shift schedules natively.

Transparent Earnings

0% hidden fees structure and real-time take-home analytics.

Built-in KYC Vault

Secure digital upload system for Aadhaar, Driving License, and Vehicle RC to maintain a verified trust score.

Product Validation: Fleet & Admin OS

The enterprise backbone for fleet operators and platform administration.

Live Fleet Analytics

Real-time tracking of active rides, drivers, and demand peaks.

Operator Dashboard

Dedicated tools managing up to 100 vehicles per operator, identifying profitability gaps instantly.

Investor Transparency

Built-in revenue and KPI tracking natively accessible for institutional reporting.

Enterprise-Grade Architecture

Built for high availability and regional scale.

Projected Performance Targets	
1	99.9% Targeted Uptime
2	10,000+ Concurrent Requests Handling
3	< 200ms API Latency for Real-time Tracking

Competitive Landscape: The Local Advantage

Why national incumbents cannot structurally replicate our model.

Feature / Capability	✓ AutoBuddy	Uber / Ola
Driver Commission	Targeting 5-8% or SaaS tiers ✓	~25-30%
Malayalam-First Interface	Native UI & Voice SOS ✓	Secondary / Basic
Fleet Operator SaaS Tools	Dedicated Admin OS ✓	Fragmented / None
Hidden Fees	0% ✓	High / Variable
Localised Support	Regional Operations Centre ✓	Outsourced / Automated

Customer Validation & MVP Traction

De-risking execution through early ground-level validation.

Traction Metrics

50+

Face-to-face driver interactions informing product design.

100%

Of MVP features currently pilot-ready.

Prepped

Pilot architecture ready for initial Kollam launch.

11 Completed MVP Features

- | | |
|---------------------|----------------------------------|
| ✓ Fleet management | ✓ Real-time dispatch |
| ✓ Corporate rides | ✓ 1-click SOS |
| ✓ Airport rides | ✓ Driver trust score |
| ✓ Ride pooling | ✓ Integrated KYC |
| ✓ Live analytics | ✓ Transparent earnings dashboard |
| ✓ Operations centre | |

Projected Business Model & Economics

Diversified, driver-friendly revenue streams designed for high retention.

Transactional Commissions

Targeting a 5-8% fair commission structure (vs industry average of 25%+).

Projected to drive a 40% higher driver retention rate.

Subscriptions (SaaS)

₹199-499/month targeted premium tiers for driver access and zero-commission models.

Projecting a 10% operating margin.

Enterprise B2B

Corporate and enterprise mobility contracts.

Leveraging the dedicated Fleet Platform OS.

Projected Roadmap & Target KPIs (2026-2028)

Focused pilot launch with measurable milestones to validate regional market fit.

Targeting 5,000 onboarded drivers.
KPIs include **1000+ ride volume**, **90%+ completion rate benchmark**, **achieving positive unit economics by Month 6**, and proving scale readiness.

Scale infrastructure, target **₹1.5 Crore ARR**, expand coverage to 3 districts.

Target full coverage across all 14 districts with **50,000+** onboarded drivers.

2026

Kollam Pilot Launch

2027

Platform Growth

2028

Kerala Expansion

Leadership

Combining technical execution with deep regional insight.

Dhanya Mohan

Founder

- **Product Vision:** Conceived and drove the strategy to build a localized 'Trust Layer' directly addressing the failings of generic national platforms.
- **Execution Capability:** Led the development process bringing the 11-feature MVP to a fully pilot-ready state.
- **Regional Insight:** Deep, nuanced understanding of the Kerala mobility market and local driver economics.

The Ask: KSUM Innovation Grant Utilisation

Requesting ₹3,00,000 to ignite the Kollam pilot and validate commercial scalability.

The Financial Breakdown

Activity	Allocation
Product Hardening	₹90,000
Driver Onboarding	₹70,000
Cloud & Infrastructure	₹50,000
Safety & Compliance	₹50,000
Demo & Validation	₹40,000
Total Grant Request	₹3,00,000

The Summary Pitch

AutoBuddy is building Kerala's own mobility OS.

- ✓ Working MVP completed
- ✓ Large market opportunity
- ✓ Kerala-first strategy
- ✓ Proven revenue model
- ✓ Pilot-ready architecture
